

Instructions: Deluxe Portable Golf Car Windshield

⚠️ WARNING

Make sure your field of view is not obscured after mounting your windshield to your golf car.

⚠️ CAUTION

Be sure your windshield is strapped securely and tightly to your golf car.

Installation

1. Attach the top straps to the roof support bars first, then attach the bottom straps.

2. Working with the top straps first, tighten or loosen the straps to position your windshield in the center of the roof support bars. Once it is centered and level, tighten all straps down.

Cleaning: Don't clean the clear plastic of your windshield when it is dry—you can scratch it. The best way to clean the clear plastic is to hose it with water and rub it with your bare hands or a soft cloth. Liquid soap may be used.

Storage: To avoid mildew be sure that your windshield is completely dry before you store it for an extended period in an enclosed area.
