INSTRUCTIONS: UTV ROLL CAGE TOP

⚠️ WARNING
Make sure your field of view is not obscured after attaching your Roll Cage Top to your UTV roll cage.

⚠️ WARNING
This Roll Cage Top will NOT protect against noise, engine exhaust, chemicals, collision, roll-over or other accidents.

⚠️ WARNING
Usage of this Roll Cage Top DOES NOT negate the necessity of wearing a helmet.

⚠️ CAUTION
Be sure your Roll Cage Top is strapped securely and tightly to your UTV roll cage.

Installation

1. Unfold your Top and locate the enclosed adhesive backed rip-and-grip strips. Set these aside.
2. Find the yellow tag that says “front” on the underside of your Top indicating what side faces the front. Lay your Top over the roll cage of your UTV and loosely fasten the rip-and-grip straps at each corner to the roll cage bars (Fig. 1).
3. On the underside of your Top, there are two tension panels with straps (Fig. 2). Locate the straps and connect the side-release buckles. Make sure that the tension panels go OUTSIDE and AROUND the side bars of your roll cage (Fig. 2). Tighten both straps. Fold extra strap into a three or four inch length and insert into the strap keeper on each strap (Fig. 3).
4. Take the enclosed adhesive backed rip-and-grip strips and, working at each corner, unfasten the strap and note where the rip-and-grip panel on the underside of your top comes in contact with the roll cage bar. Peel the back off a rip-and-grip strip and attach it to the roll cage bar about one inch lower on the roll cage (Fig 4). This will provide space for you to pull your Top tight on the roll cage. Pull the corner of your Top down tight and reattach the web strap tightly. Repeat with the other three corners. Check the straps at each corner of your Top and be sure all are tightly fastened.

NOTE: On most models the underside of the roll cage top is lined with a rip-and-grip panel (front side only) that can be used to combine with the UTV windshield (windshield sold separately). See Fig. 6

Cleaning

Clean your Roll Cage Top with a soft brush and warm water. Air dry.

Storage

To avoid mildew be sure that your Roll Cage Top is completely dry before you store it for an extended period in an enclosed area.
